I've been running for about a month and now training for a 5k distance for the first time in my life. Luckily, as I'm reading this book I'm finding that most of the information I gathered by online reading is accurate, but some of my information was indeed a little off base for where I'm at in my level of fitness. This book is extremely comprehensive and encouraging. For someone like me who needs information, structure and a game plan, this book is perfect. It really helps to make sure that every run you do is being done in a way that best helps you, whether you're running for speed, health, or weight loss. The authors are very knowledgeable, both about running itself and running culture (the latter of which is very comforting when you're first breaking into a new sport and don't know what the heck you're doing). I would highly recommend this book, especially if you haven't started running yet or even if you have and you want to know how to get better more quickly.
